ALLEGED SHIPMENT: On or about December 21, 1950, from New York, N. Y.

PRODUCT: 1 1,000-tablet bottle of *conjugated estrogens* at Bayonne, N. J. Analysis showed that the product contained a total amount of estrogenic steroids calculated as 0.66 mg. of sodium estrone sulfate per tablet.

NATURE OF CHARGE: Adulteration, Section 501 (c), the strength of the article differed from that which it was represented to possess, namely, 1.25 mg. of estrogens in their naturally occurring water-soluble conjugated form expressed as sodium estrone sulfate.
