

4307. Adulteration of liquid eggs. U. S. * * * v. 450 Cases of Liquid Eggs * * *. Consent decree of condemnation, forfeiture, and destruction. (F. & D. No. 6902. S. No. E-410.)

On October 5, 1915, the United States attorney for the District of Maryland, acting upon a report by the Secretary of Agriculture, filed in the District Court of the United States for said district a libel for the seizure and condemnation of 450 cases of liquid eggs, more or less, remaining unsold in the original unbroken packages at Baltimore, Md., alleging that the product was in process of transportation from the State of Maryland into the State of New Jersey for export, and charging adulteration in violation of the Food and Drugs Act.

Adulteration was alleged in the libel for the reason that the liquid eggs consisted in part of a filthy, decomposed, and putrid animal matter, to wit, rots and spots, and of eggs of a general class unquestionably unfit for food purposes; said product also containing about 2 per cent boric acid [used] in preservation of said product.

On October 6, 1915, The Eastern Tanners Egg Yolk Co., Baltimore, Md., claimant, having filed its answer admitting the material allegations in the libel and submitting to a decree, judgment of condemnation and forfeiture was entered, and it was ordered by the court that the product should be destroyed by the United States marshal.
