Analysis of a sample of the article made in the Bureau of Chemistry of this department showed that it consisted essentially of a laxative plant drug, small amounts of quinine, strychnine, iron salts, glycerin, alcohol, and water.

Misbranding of the article was alleged for the reason that the statements, borne on the cartons enclosing, and on the labels on the bottles containing, the article, regarding the curative and therapeutic effects thereof, as above set forth, were false and fraudulent in that the article contained no ingredient or combination of ingredients capable of producing the curative or therapeutic effects claimed for it.

On December 8, 1919, no claimant having appeared for the property, judgment of condemnation and forfeiture was entered, and it was ordered by the court that the product be destroyed by the United States marshal.

7507. Misbranding of Enoob Antiseptic Injection and Enoob Capsules. U. S. * * * v. 18 Bottles of * * * Enoob Antiseptic Injection and 22 Packages of * * * Enoob Capsules. Default decree of condemnation, forfeiture, and destruction. (F. & D. No. 10751. I. S. Nos. 13942-r, 13943-r. S. No. E-1581.)

On June 24, 1919, the United States attorney for the Southern District of New York, acting upon a report by the Secretary of Agriculture, filed in the District Court of the United States for said district a libel for the seizure and condemnation of 18 bottles of an article labeled in part, “Enoob Antiseptic Injection,” and 22 packages of an article labeled in part, “Enoob Capsules,” remaining unsold in the original unbroken package at New York, N. Y., alleging that the article had been shipped on or about December 14, 1917, by the Tropical Co-operative Co., Jacksonville, Fla., and transported from the State of Florida into the State of New York, and charging misbranding in violation of the Food and Drugs Act, as amended.

Analyses of samples of the articles made in the Bureau of Chemistry of this department showed that the injection consisted essentially of a solution of phenol, menthol, thymol, boric acid, and zinc sulphate in water, and that the capsules consisted essentially of cubeba, copaiba, gum turpentine, and pepsin, with indications of santal oil.

Misbranding of the articles was alleged in substance in the libel for the reason that the articles, used singly or in combination, were not capable of producing the therapeutic and curative effects claimed for them on the labels and cartons, and in the circulars and testimonials borne and contained in the bottles and packages, and that said claims were false and fraudulent, and that the said bottles, labels, cartons, circulars, and testimonials bore and contained certain statements as to the curative and therapeutic effects of said articles and of the ingredients and substances contained therein, for the treatment and cure of gonorrhœa, gleet, and other diseases of the bladder and urinary organs, whereas, in truth and in fact, neither of said products contained any ingredients or combination of ingredients capable of producing the effects claimed on the labels and cartons, and in the circulars and testimonials, nor did both of said articles used in combination contain any ingredient or combination of ingredients capable of producing the effects claimed in said statements.

On July 16, 1919, no claimant having appeared for the property, judgment of condemnation and forfeiture was entered, and it was ordered by the court that the product be destroyed by the United States marshal.
