On May 8, 1920, the United States attorney for the District of Arizona, acting upon a report by the Secretary of Agriculture, filed in the District Court of the United States for said district a libel for the seizure and condemnation of 16 bottles of Sterling Injection, remaining in the original packages at Phoenix, Ariz., alleging that a portion of the article had been shipped by the Western Wholesale Drug Co., Los Angeles, Calif., on or about March 27, 1920, and transported from the State of California into the State of Arizona, and that the remainder of the article had been shipped in interstate commerce, the date and manner of said shipment being unknown, and charging misbranding in violation of the Food and Drugs Act, as amended.

Analysis of a sample of the article by the Bureau of Chemistry of this department showed that it consisted of an aqueous solution containing opium, borax, and a trace of sulphate.

Misbranding of the article was alleged in substance in the libel for the reason that the bottles and cartons containing the article bore a statement as follows, (English and Spanish) "'Sterling' Injection is a compound especially prepared for the treatment of Gonorrhoea, etc.," which statement was false and fraudulent in that the article contained no ingredient or combination of ingredients capable of producing the curative or therapeutic effects claimed.

On February 26, 1921, no claimant having appeared for the property, judgment of condemnation and forfeiture was entered, and it was ordered by the court that the product be destroyed by the United States marshal.
